

## 4. Ballots

In Chapter 3 we should have made clear our preference for the grid format ballot, which is particularly well suited to small elections. With grid ballots the only thing required to indicate preference is “blacking in” a square, so a voter’s handwriting ordinarily does not become an issue. Grid ballots also allow for instant detection of duplicate rankings. One drawback of grid ballots is they provide an opportunity for voters to accidentally give one candidate more than one rank. Fortunately, a candidate given more than one rank is meaningless in STV, so the easy solution is to accept the highest rank only.

In spite of the apparent simplicity of grid ballots, they are certainly not going to be understood immediately by everyone. In fact, at first glance some may view large grid ballots as bewilderingly complex. To clear up any such confusion, a set of instructions should be composed to accompany the grid layout, such as: “Only one vote for each candidate. Only one vote for each column.” Still some voters will inevitably write numbers into the squares, and will want to know if they are supposed to fill in the squares, or mark them with checks, and so on. A visual aid, such as a didactic panel featuring an oversized grid ballot, can be very helpful in getting the message across. For easier reading, on the ballot itself you may try adding a space every four or five rows or so.

A sample grid ballot from the 2004 KPFK Local Station Board Listener-Sponsor election is included at the end of this chapter, and there are sheets of sample ballots for the mock election provided in Chapter 6 on pages 30-43.

Alternate formats are certainly possible, and may be suited to particular elections. The most common alternative to grid format is a simple column of all candidates with spaces for voter rankings next to each. Here is an example of such a ballot, though it does contain one design

**LSB to PNB Directors**

Do not rank more than one  
candidate per rank.

\_\_\_\_\_ Candidate A

\_\_\_\_\_ Candidate B

\_\_\_\_\_ Candidate C

\_\_\_\_\_ Candidate D

\_\_\_\_\_ Candidate E

\_\_\_\_\_ Candidate F

flaw. In order to accommodate last minute nominations, this ballot has assigned letters to the candidates, in lieu of their actual names. What happens if some voter decides to mark the spaces with alphabetical letters instead of numerals? How will such a ballot be interpreted?

<b>LSB to PNB Directors</b>	
Do not rank more than one candidate per rank.	
<u>  <i>c</i>  </u>	Candidate A
<u>  <i>e</i>  </u>	Candidate B
<u>  <i>d</i>  </u>	Candidate C
<u>  <i>a</i>  </u>	Candidate D
<u>  <i>b</i>  </u>	Candidate E
<u>  <i>f</i>  </u>	Candidate F

You can see in the ballot above that it could be reasonably decided the voter intended the letters to represent numeric values, in which case Candidate D would have been ranked as first choice, Candidate E as second choice and so on. But how can you be sure the voter did not intend to list the candidates by initial in descending order? In this case Candidate C would be ranked first, Candidate E ranked second. It would probably have been better to leave the names at the right blank, taking the time to fill them in at the last minute to avoid this potential for confusion.

Whatever format is ultimately chosen, it is preferable for small hand tallied elections to have small ballots printed on card stock. These are easiest to handle, and can be color coded for multiple elections. Always be sure to prepare extra ballots so that voters may request replacement ballots should they make an error of some sort.

It generally makes sense to provide a space for write in candidacies on the ballot, even though there is little real justification for a write-in candidacy in a small election. But, seeing as there always may be some confusion regarding rules of nomination, it makes sense to be prepared for the off chance that write-ins might occur anyway. The board officers likely will be aware of any serious attempts at launching a write-in candidacy, so good communication with the officers is vital here. When appropriate, the chair should announce prior to voting that write ins will or will not be counted.

It should go without saying that it is good to be prepared for seemingly inevitable duplicate rankings (more than one candidate given the same rank) that turn up on returned ballots. Pa

cifica has a recent tradition of accepting duplicate rankings, so it may be difficult to achieve an absolute ban on them. However it is within the purview of the election team to advise voters during preliminary, instructional remarks that to vote more than one candidate at the same rank is not in their best interest as voters, and that it complicates the tallying process as well. You may also add that it tends to generate a disproportionate number of ties. Most Delegates won't want all of their officers, directors etc. selected by the toss of a coin.
